HERBST BROTHERS'  
SPECIAL SCOT'S PINE

is the product of the most pains-taking tree-breeding in the last 200 years of practical forestry.

FOR STRAIGHT-  
GROWING TREES

**General Data:** These trees grow from 65 to 98 feet high and attain an age of 66 to 120 years. Knots usually on upper third of trunk—lower two-thirds clear. Needles 2 3-10 inches to 3 1-10 inches long—borne in very heavy clusters. Color of needles: deep green from September to April—a trifle lighter from May to August. Seedlings reach a height of 4 to 6 inches in first year—growth thereafter, 11 to 25 inches yearly.

## It's Fast Growing and Good

Please remember that ALL "H. B. SPECIAL SEED" are gathered from trees—never from the ground.

The climber's equipment consists of: a half-bushel conebag slung across the shoulders; a light-weight 8 to 10 foot pole with a hooked end for drawing in the cone-bearing branches for ease in picking; and the usual lineman's climbers.

## PETUNIA

PETUNIA ALL-DOUBLE TALL GIANT FRINGED  
MIXED COLORS

"Triumphant" (Sakata's Novelty No. 1)

The ONLY PETUNIA of all times, to produce 100% double-flowered plants. Since we introduced the "ALL-DOUBLE GIANT FRINGED PETUNIA" seed one year ago, we have done everything possible to improve it, both in regard to color and size. We have also done our best to eliminate the Small Flowering Doubles.

We are now, therefore, able to offer such seeds which not only grow 100% double-flowering plants, but which also produce flowers of immense size. These flowers show a wonderful assortment of beautiful colors, such as Carmine, Brilliant Rose, Velvety Purple Violet, Purple, White, Creamy Yellow, and innumerable intermediate as well as variegated colors. These flowers, which are exquisitely fringed and duplexed, very often measuring as much as Five Inches across.

Trial Packet, \$1.00

Please refer to Nursery Stock Prices on pages 22-24.  
We shall gladly consider your offers.

**PETUNIA ALL-DOUBLE DWARF GIANT FRINGED  
MIXED COLORS**

**"Victorious" (Sakata's Novelty No. 2)**

The ONLY DWARF COMPACT PETUNIA which produces 100% Double-Flowered Plants. It is identical with the Tall Type in regard to its 100% double flowering character, while its Dwarf Compact Form enhances its popularity. These plants are remarkably uniform in habit, producing a wonderful assortment of brilliant and fancy colorings. They produce very large, fully doubled flowers, and being extremely floriferous, have an appearance similar to the double flowering Indian Azalea. As they seldom grow more than ten inches in height, they are very suitable for pots and for borders.
